

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BIBLIOGRAPHY OF MISSOURI.

The following "Bibliography of Missouri" is presented with a realization that such a work is necessarily imperfect. The imperfection is of two kinds; first, the failure to include all works that have been written by Missourians; and, second, the including of works that do not properly belong to Missouri. Of the first there will be many or few instances according to the time spent in preparing the list, the opportunities for obtaining titles, and the diligence with which such opportunities are improved. The second error results from misinformation. In many cases, where the list contains a book by a certain author, librarians have suggested other works by the same author, when the fact was that the publication first noted was published while the author was a resident of the State, and the other works after the author had removed to some other State, which would exclude the latter, unless the author were a native of Missouri. To keep clear of this second imperfection the biography of the authors must be learned so as to know the residence at the time of each publication, and while the author has given the matter careful attention he has no idea that his information has always been correct. Still another imperfection arises from having incorrect titles. It is possible in this way to have the same book under different titles, the one being taken from the title page and the other from a notice of the work, in which it is referred to more from the character of the contents than from the title page. And, in fact, it is sometimes uncertain that the list is correct after studying carefully a letter from the author himself. With few exceptions sermons or speeches have not been included, unless the work mentioned contains a series of such. The list would be more interesting to some persons were it of books relating to Missouri. Such a list should be published, but for present purposes it was thought best to limit the scope of the bibliography as has been done. Additional value is given by noting what books in the list are found in the library of the

author, the Mercantile Library of St. Louis, and the Public Library of St. Louis. The 780, the 640 and the 852 titles found in these libraries give the student access to a considerable per cent of the total of 2,300 titles. The works in the library of the St. Louis Medical Association are also noted. Assistance in the preparation of the work is cheerfully acknowledged from the libraries of St. Louis, Kansas City, Jefferson City and others; from the book publishers and book stores, and from Dr. Alexander N. DeMenil, (whose "Bibliography of St. Louis" has greatly aided this compilation), and many other individuals.

Works in the library of the author are marked *, the Mercantile Library †, the Public Library ‡, and the Medical Library ||.
